

March 23, 2020

Dear 80/20 Partner,

The state of Indiana has instituted a widespread “shelter-at-home” directive. The purpose of the directive is to minimize non-essential travel and human interaction to flatten the curve and reduce the spread of the Covid-19 virus. It is important to note that the directive strongly encourages “essential businesses” to remain open to meet the needs of the population and to feed other essential business with the product and support they require.

Many of 80/20’s customers and industries are listed as “essential business” such as grocery stores, food processing, hospitals, biotechnology, pharma, gas stations, utilities, telecommunications, airports, railroads, transportation infrastructure, construction, sanitation, manufacturers of personal protective equipment, and many others. Under the directive, 80/20 is considered an essential business operation and will continue to operate normally to offer services for our customers who provide essential services to the community.

We are taking this directive very seriously. We know that many of our products and services are not commonly available and therefore, we are committed to a fast response to meet your requirements. In a situation where you require an emergency response, please let us know so we may respond accordingly. We appreciate your cooperation during this period of adjustment.

Please feel free to contact us directly should you need more information.

Thank you,

A handwritten signature in blue ink that reads 'Patrick H. Buesching'.
